

NGN — E-BIKE BATTERY SAFETY LEAFLET

E-BIKE BATTERY SAFETY — QUICK GUIDE

Essential safety steps and home-charging best practice — Neguinho Motors Ltd / HI-BIKE4U LTD (NGN)

Key Safety Rules (Must Follow)

- Use only the **ORIGINAL charger** supplied with your NGN E-Bike or a charger authorised in writing by NGN.
- Charge the battery in a **supervised location** while you are awake and alert. **DO NOT charge overnight while sleeping.**
- Do **NOT** charge on sofas, beds, stairwells, communal corridors, or other escape routes. Prefer a ventilated garage or outdoor shed.
- Do **NOT** cover the battery or charger while charging. Keep the charger on a hard, non-combustible surface.
- Install and test **smoke/heat alarms** in your property — ensure they are active while charging.
- Inspect the battery and charger before every charge. If the battery is swollen, hot, smoking, emitting an odour or making noises, **STOP** and call NGN.
- Do **NOT** open, puncture, crush, repair, modify or immerse the battery. Use only NGN-approved replacement batteries and parts.
- Keep batteries away from children and pets. Store at moderate temperatures and follow manufacturer storage guidance.

If You Suspect a BATTERY FAULT or See Smoke/Fire

1. **Immediately stop charging and stop using the E-Bike.**
2. **Move all persons to a place of safety** and keep clear of the device.
3. **Call 999** if there is any fire, smoke or immediate danger. Inform the fire service the incident involves a lithium-ion battery.
4. If safe, move the charging cable away and isolate the area. Do **NOT** attempt to extinguish a large battery fire yourself.
5. Contact NGN as soon as it is safe to do so:
Tel: 0203 409 5478 / 0208 314 1498
Email: customerservice@neguinhomotors.co.uk

Home Charging — Good Practice Checklist

- Charge in a ventilated area on a hard surface; do not use extension reels where possible.
- Place the charger on a non-flammable surface and keep clear of fabrics and papers.
- Do not leave charging batteries unattended if you plan to leave the home.
- Test smoke alarms monthly and replace batteries as needed.
- Keep a household fire extinguisher suitable for electrical fires if possible (seek local guidance).
- Register any battery fault with NGN and follow collection instructions for safe disposal.
